

PONTE GRANDE – CAMPING PACKAGE INSTRUCTIONS.

There are 5 pieces to the tent:

1. 2 x side pieces, port and starboard, these are easily recognized as they have a window in them. In the top forward corner of each they are marked “Port” and “Starboard”. Port is left side and starboard is the right side when facing forward.
2. 1 x front piece – this is easily recognized as it is the only piece with a zipper on the bottom.
3. 1 x rear piece.
4. 1 x very small section which goes above the restroom privacy area.

It is a good idea to lay these pieces out in the sun for 30 minutes; this will make them easier to snap on as the material stretch when warm. Begin on the starboard side and snap this piece to the top of the roof and the bottom just below the rail. In a similar manner, snap on the port side.

Starboard

Port

Now go ahead and install the rear piece, begin by sliding the top end in the slot on the roof at the back. Then snap the bottom as indicated below.

Slide top of the cover in the slot on roof

Snap the bottom

Raise the Privacy Resroom section. Feed the bottom of the rear section around the over the rail, but behind the triangular winch mount poles as indicated below.

Take the small section and snap it to the roof in front of the privacy enclosure. Then take the bottom part of this section and fasten it to the top of the privacy enclosure as well as the Velcro on each side which attaches to the back section and the starboard section.

Now take the front section and snap it to the roof on the front of the boat

The bottom can be left to hang, or you can use the provided bungee cords to pull it out a little so the bar stools can be used.
